

GIS Future Trends

Part 1: Job Search

Use a job search website to find a GIS or geospatial job that is currently posted. Answer the following questions about the job.

1. What is the job title?
2. What are the duties/responsibilities?
3. Where is the job located?
4. Is a salary range provided? If so, what is the compensation?
5. What specific skills are of interest?
6. Does the job require any special certifications?
7. What are the degree requirements (high school diploma, associates, BA/BS, MA/MS, PhD)?

Part 2: Job Skills

Read the following article: <https://www.directionsmag.com/article/1143>. Write a paragraph summarizing this article. What did you take from this article in regards to preparing yourself for a geospatial career?

Read the following article: <https://www.directionsmag.com/article/1138>. Write a paragraph summarizing this article. What did you take from this article in regards to the value of learning to code as you prepare for a geospatial career?

Part 3: Future Trends

What are two trends or developments in the geospatial technologies that you think will be very important in the future development of the disciplines. Why do you think these trends are so important?
