Web GIS Project 4: ArcGIS Experience Builder

Grading: 50 Points

Description: Create a multipage website using ArcGIS Experience Builder.

Notes:

- ❖ Website must have multiple pages linked by a navigation bar.
- ❖ The entire site should have a consistent theme and use a consistent color palette.
- ❖ The website must include at least one ArcGIS Online map.

Rubric:

- ❖ Page must contain all of the following elements: at least one map, headers, paragraphs, lists, images, and a navigation bar. **(Up to 10 Points)**
- ❖ All pages should use a consistent style/theme. **(Up to 10 Points)**
- ❖ Make sure to cite all data and references on the page. **(Up to 5 Points)**
- ❖ Website should be responsive to changes in the screen size. **(Up to 5 Points)**
- ❖ All data layers should be properly symbolized. **(Up to 5 Points)**
- ❖ All data pop-ups should be configured. If a pop-up is not necessary, then it should be disabled. **(Up to 5 Points)**
- ❖ Overall quality of website, maps, and presentation. The resulting webpage should be professional, functional, and well configured. The site should have a clear theme and purpose and be designed with these in mind. **(Up to 10 Points)**

Deliverables:

- ❖ URLs for website
