Project 2 (Midterm Project): Multipage Website with ArcGIS ExperienceBuilder (Up to 200 Points)

Task: Generate a multipage website using ArcGIS ExperienceBuilder. The purpose of this website is up to you. However, it must have at least four linked pages and must contain at least two web maps.

Requirements:
1. Webpages should use consistent themes, fonts, and colors.
2. At least four interrelated pages should be produced.
3. Buttons/a navigation bar should be used to allow for navigating between pages.
4. Make sure to cite all data sources and references.
5. The pages must include text, at least two maps, images, lists, and buttons.

Grading Considerations:
- ❖ The goals of the project are clear and the generated content meet the stated goals. (Up to 20 Points)
- ❖ Included all required content and number of pages. (Up to 30 Points)
- ❖ All content is well designed and formatted. (Up to 40 Points)
- ❖ Page is well laid out and responsive to changing screen sizes. (Up to 30 Points)
- ❖ Consistency of themes and styles. (Up to 20 Points)
- ❖ Cite all data sources and references. (up to 20 Points)
- ❖ Appropriate and effective symbology for all layers in maps; pop-ups are well configured or disabled if not necessary. (Up to 40 Points)

Deliverables:
- ❖ Less than one-page write up that describes the purpose of the website.
- ❖ URL for website. Make sure to share the app and all assets with at least the WVU ArcGIS Online organization.
